

Trinidad - PYØT The Natal DX group's two-month Trinidad DXpedition is scheduled to leave Rio de Janeiro June 1-2, with arrival at Trinidad in a couple of days. Callsigns will be **ZYØTK** on SSB, operated by **PS7KM**, and **ZYØTP** on CW, **PT7AA** operator. QSL home calls. This should clear up demand for this, the third Most Wanted country in South America.

Cocos-Keeling - VK9 The **VK9EW/VK9WB**

DXpedition was pushed back a week when their flight to Cocos was cancelled. Assuming no further set-backs, they are due on May 26, for one week (two weeks if their return flight is cancelled!) See Issue 535.

Gibraltar - ZB2 Andreas Söchting **DK6AS** will be **ZB2/** May 25-June 5, CW only, usual DX frequencies (3505, 7005, 14025, 21025, and 28025 kHz.) QSL via **DJ8MT** or to Box 952, D-3180 Wolfsburg 1, FRG.

Edited by Chod Harris **VP2ML**

The DX Bulletin

America's Premier Weekly Amateur Radio Publication

Yemen - 7O Several Kuwaiti amateurs have announced on some DX nets that they will operate from the People's Democratic Republic of Yemen (aka South Yemen) for at least 10 days, beginning May 19. 10-20 meters only, mostly SSB, maybe some CW. Watch 28400, 21300, and 14250 kHz, as well as SSB nets.

Reserve Your Island - WPX CW

■ **ZF2PF/ZF8** on Little Cayman is John Patterson **WCØW** in an all-band, single-op effort. He'll be there May 19-28, mostly CW, usually 20 kHz up on the lower bands. His wife Lee **WCØT** will be on 28450 kHz at **ZF2PE/ZF8**. QSL both to **WCØW**.

■ **VP2VDX** and **VP2VCW** are Tom Morton **KT6V** and Terry Baxter **N6CW** respectively, each operating a single band, 10 or 15 meters. They'll be on 6 meters and the other bands May 23-25. QSL home calls.

■ **SX5AA** is WPX CW call of **N2OO**, **SVØAA**, and **WA3TYP** from Rhodes. See Issue 535 for more info.

Reserve Your Island WPX CW, Continued

■ **J49BDX** is the multi-single entry of Albert **DL7MAT**, Ben **DL6RAI**, and Wolfgang **DL5MAE**. They'll be on **SV9/** outside the test, mid-May to mid-June. 160-2 meters, mostly CW. Check 33 kHz up from the bottom of the bands, and 144.033 MHz. Whole calls, please. QSL **J49BDX** via **DL7MAT**; others via home calls. Bureau cards preferred.

Shortly Noted

■ **FJ/F1MGS** will be active from St. Barthelemy (NA-105) May 15-31. He may use his old call of **FJ5BL**. (**DXNS**.)

■ **9Q5SL** is often on 14277 kHz at 1815Z. (**MDXN**.)

■ **IR9ITU** will be active to May 28, including the WPX CW on 10 meters. QTH is Sicily. QSL Maurizio Tramuto **IT9TQH**, Box 18, Palermo 90100, Italy.

■ **PY4VB/D2** hopes to gain operating permission, now to May 20. Watch 14005, 21005, and 28005 kHz on CW, and 14145, 21280, and 28455 kHz on SSB. QSL **PY4OD**.

■ **HZ1AB** is active every other day on 20M SSB, 1330-1430Z.

■ **WA4SIR-1**'s space shuttle operation this week is mostly 2-meter packet, including 144.95 MHz. Expect interference to the numerous PacketCluster DX spotting nodes on that frequency during shuttle passes. Shuttle audio is relayed on 20192 kHz, lower sideband. Check **W1AW** and NASA stations **WA3NAN**, **W5RRR**, and **W6VIO** for details.

■ **6 Meters**: Dave Heil **9L1US** has a beacon on 50.0915 MHz, running 14 watts into a vertical, thanks to **N4LTA**. Thanks to **SMIRK**, **VE1YX**, and some SouthWest Ohio DX Association members, Dave now runs 110 watts into a 3-element beam on 6 meters.

■ **Soviet special callsigns**: **RN7N** will be active June 4-8 by the Karelian DX Club. QSL Victor Sinjavin **UA1NEJ**, Box 520, Petrozavodsk 26, 185026 USSR. To locate some of the one-letter-prefix Victory special-event calls in May, here's some hints: The first letter of the suffix is the Republic. The second letter of the suffix is the Oblast. The number is the country, if **RSFSR**. Single-suffix stations and EU stations are in the capitals of the 15 SFSR republics. EV stations are in the capitals of the 20 autonomous republics. EM, EO, and EW stations are in other cities.

■ **SSB Net check-ins**: 14222 kHz: **VK9NS YJ8AB VR6JR**; 14227: **VK9TR N6BUV/KHØ AH9AC D44BS VK9LA T3ØBC 9M8FH FR5ZC FT5XA FK8GA 5W1KT XX9KA T29BT**; 14256: **FO5LZ**; 21333: **SV7DP WZ6C/ST4**.

■ **RTTY report**. Regulars: **EA9MY** 14082 kHz at 2320-0300Z; **GJ4YMX** 14083 2230Z; **HC8VB** 14088 23-0100Z; **HV3SJ** 14090 0045Z; **OD5NG** 14095 0225Z; **SU1HN** 14087 2300Z; and **UQ2HO** 14085 0640Z. Other active stations: **SV5TS** 21086 1800Z; **TR8JLD** 14085 0645Z; **T32AB** 21085 0800Z; **VU2DPG** 21073 ARQ 1500Z; **ZS9A** 21095 1710Z; **TL8TM** 21089 1530Z; **HS1BV** 21087 2240Z; **9M2AX** 21087 1800Z; **EA8ABD** 21088 1745Z.

■ **Islands On The Air**: **EH9IC** June 14-17 on Chafarinas (AF-36), by Lynx DX Group members **EA7BUD**, **EA9JV**, **EA9HY**, and **EA9JQ**. QSL **EA9KQ**. The Pyasinskiy Bay group (AS-68) should be on Aug. 1-15 as **4K4A** or **4K4RAS**. **UA9OBA** plans to operate from Iqny Island (AS-69) in June. **IK2GSO** will be active June 1-14 from the Maddelena Archipelago (EU-41).

Propagation Watch

The sun continues to follow a 27-day cycle of activity. After solar flux dropped to its lowest level in more than a year on May 4th, activity rebounded as the more active side of the sun rotated in our direction, and flux levels headed for the 250 range.

Unfortunately for DXers, this up-and-down cycle doesn't provide the sustained band openings that a steadier level of activity would provide. Not only do the bands practically fold up at minimum activity, but the ionosphere tends to lose much of its refractive properties during the bottom of each solar revolution, and band conditions are thus not as good at the 27-day peak as they might be. Seasonal effects are also contributing to deteriorating band conditions. The seasonally lower maximum useable frequency (MUF) has severely limited openings on 10 and 12 meters, and the increase in absorption has eliminated 80- and 160-meter openings.

Even worse, the monthly increase in solar activity has been accompanied by an increase in geomagnetic activity. Even when the flux is high, a disturbed geomagnetic field limits long-haul and polar-path DX.

The net effect of these factors is to crowd DXers into 40-15 meters. 40, 30, and 20 meters are still open much of the night, with good openings at local sunrise and sunset. 15 meters is the daytime DX band, with openings following the sun. 18 meters shows characteristics of both 20 and 15 meters, with some DX possibilities during daylight hours, and excellent signals at local sunset. Solar activity will drop over the next two weeks, to a minimum around the end of May.

Stu Perry W1BB - Silent Key

Stewart Perry W1BB passed away May 5 at the age of 86, after several years of ill health. Stu was Mr. 160 Meters for many years, and was responsible for encouraging much of the activity on the band, and in making certain that Top Band retained its reputation as the Gentlemen's Band.

Stu was inspired to become a radio amateur in 1912, after listening to transmissions about the Titanic disaster. He built his first radio set that year, at age 8. Soon thereafter, Stu became 1BB, and eventually W1BB, his only callsign for 70 years.

Stu strung up a wire off a water tower at Point Shirley, on the seacoast near Winthrop, Massachusetts, and became the first amateur to work 100 countries on 160 meters. He held 160-Meter DXCC certificate Number 1. Stu spent much of his time encouraging others to become active on Top Band, and he published his 160 Meter Notes for many years, until declining health forced him to give up the task.

Newcomers to Top Band don't know what they have missed over the past few years, when Stu was unable to operate, but long-time 160-meter devotees understand that Stu's death marks an end to an era of the Top Band.

Notes From All Over

■ The 1991 International DX Convention in Visalia, California, is set for April 12-14, 1991, at the Holiday Inn. The Northern California DX Club is the sponsor next year, with Steve W6MKM the chairman. Last year the hotel booked up very early; it's not too early to make your reservations for the largest DX-only convention in the world. Call the Holiday Inn at 800-821-1127 from California, 800-348-8877 outside the state, or 209-651-5000 from elsewhere, 8-4 Pacific time, and ask for Sheree.

■ And for those DXers whose feet and budget were not destroyed by the 1990 Dayton Hamvention, the 1991 edition runs April 26-28. To make reservations at the Stouffer Center Plaza (the center of the DX activities), call the hotel at 513-224-0800.

■ Closeout on 1990 *Callbooks*: North American edition \$22.95, Foreign \$24.95, both \$45.95, postpaid in the US. (California orders add 6.25% sales tax.) Send check to Duane Heise AA6EE, 16832 Whirlwind, Ramona CA 92065.
